D.O.B. April 8<sup>th</sup> 1989  
Nationality: German

**Private address:**  
Morskade 14  
2332 GB Leiden  
The Netherlands

Last updated February 18, 2020.

## Personal profile

Currently, I am a Postdoc in the department of Molecular Epidemiology at the Leiden University Medical Centre, working on translational research of healthy ageing in familial genetic studies, and longitudinal intervention data.

In this position, I am a bioinformatician, a field which, through the constant evolution of techniques available in biology, must constantly adapt by developing and applying novel methods and methodology. It also requires the practitioner to develop multidisciplinary skills from the statistical, computational and biological domains. I am excited to be part of a field in which my knowledge and competences are constantly challenged, humbled and developed. The distinction between bioinformatician and biologist is degrading, and increasingly, it is biological questions that drive me. Beyond the technical aspects, I am interested in the broader social applicability and consequences of the methods which I develop and use.

## Employment

<b>Jan. 2018 - Present</b>	Postdoc at Department of Molecular Epidemiology, Leiden University Medical Centre <i>Bioinformatician on healthy ageing, together with Max Plank Institute of Biological Ageing. Within the ERC funded "Geroprotect" project.</i>
<b>Nov. 2016 - 2017</b>	Postdoc at KNAW/Westerdijk Institute of Fungal Biodiversity <i>Embedded bioinformatician.</i>
<b>Nov. 2012 - 2016</b>	PhD Candidate <i>Conducted research and performed teaching. Within the STW funded "Push the white button" project.</i>

## Education

<b>2012-2018</b>	Pattern Recognition and Bioinformatics group, TU Delft, The Netherlands <i>PhD in Bioinformatics.</i> <i>Bioinformatic Analysis of Genetic and Transcriptomic Variation in Fungi.</i>
<b>2010-2012</b>	Leiden University, Leiden, The Netherlands (In cooperation with TU Delft) <i>MSc Computer Science Track Bioinformatics.</i> <i>Thesis on protein function prediction using Conditional Random Fields.</i>
<b>2008-2010</b>	Heriot Watt University, Edinburgh, Scotland <i>BSc (Ord) Computer Science</i> <i>Graduated with distinction.</i>
<b>2007-2008</b>	Napier University, Edinburgh, Scotland <i>Certificate of Higher Education</i> <i>Completed year 1 of Computer Studies, then transferred to Heriot Watt University.</i>

## Skills

<b>Analytical</b>	Machine learning and statistics; "Data Science". Analysis of Sanger, NGS and long-read sequencing data (genomic, transcriptomic, epigenomic). Genetic/Genomic analysis (Genome assembly, Linkage analysis, *-WAS & *-QTL, Comparative genomics, Phylogenetic analysis, Variant calling) Transcriptomic analysis (Differential expression, Alternative splicing, Variant calling,
-------------------	---

<b>Technical</b>	eQTL analysis, Time-series analysis). Epigenetic analysis (Methylation), and Metabolomic data analysis.
	Python, Scala, C/C++, Java, Shell, Matlab, R SQL, XML (and related technologies), $\text{\LaTeX}$ . Vector image editing (Inkscape, Affinity Designer). Pipeline development and management (Snakemake, Workflow Description Language, Anaconda, Jupyter Notebook). Experience with schedulers (SLURM, PDB) and version control software, (Git, SVN). Experienced with Unix environments (Linux, MacOS).
<b>Languages</b>	Native speaker, English, Norwegian and German. High level Dutch. Beginners French.

## Referees

<b>Upon request</b>	Contact Thies for referee contact details.
---------------------	--

## Teaching

<b>MSc Courses</b>	<i>Frontiers of Science - Short Research Project</i> Teaching assistant. Fall 2019 at Leiden University Medical Center.
	<i>Functional Genomics and Systems Biology</i> Lecturer and teaching assistant. Fall 2014, 2015, and 2016 at TU Delft
	<i>Computational Molecular Biology</i> Teaching assistant. Spring 2012 at Leiden University
<b>BSc Courses</b>	<i>Biomedical Informatics</i> Lecturer. Fall 2019 at Leiden University Medical Center.
	<i>Clinical Research in Practice</i> Lecturer. Fall 2019 at Leiden University Medical Center.
	<i>Clinical Biotechnology: Bioinformatics</i> Teaching assistant. Fall 2018, 2019 at TU Delft.
	<i>Molecular Data Science</i> Teaching assistant. Spring 2018 at Leiden University Medical Center
	<i>Life Science and Technology Bioinformatics</i> Teaching assistant. Spring 2016 at TU Delft.
<b>External Courses</b>	<i>Genome Scale Data Analysis</i> Lecturer and teaching assistant. Fall 2014 at TU Delft
	<i>Quantitative biology summer school</i> Lectured on computational aspects of synteny and alternative splicing in fungi. Summer 2015 at Utrecht University.

## Student Supervision

<b>Myrthe de Haan</b>	B.Sc student 2019-2020 <i>Using the drug-protein interactome to predict intervention-mimicing drugs.</i>
<b>Jet Beekwilder</b>	B.Sc Student 2017-2018 <i>Comparison of DNA extraction methods from fungi for Nanopore sequencing.</i>
<b>André Vollering</b>	M.Sc Student 2014-2015 <i>Heterosis: Finding Associated Genomic Regions. (Under embargo)</i>
<b>Valerie Pourquie</b>	B.Sc Student 2015 <i>Conservation of polarization proteins in yeast and fungi.</i>
<b>Dimitris Palachanis</b>	M.Sc Student 2013-2014 <i>Using the Multiple Instance Learning framework to address differential regulation.</i>

## Other activities/skills/information

<b>Awards</b>	Nature Ageing, Rejuvenation and Health Conference 2019, 'Best Poster' award. ECCB 2016 Student Symposium, 'Best Oral Presentation' award. Benelux Bioinformatics Conference 2015 Student Symposium, 'Best Oral presentation'. TU Delft Graduate School, 'Best poster presentation' award 2013. Scott Logic Computer Science Prize 2010.
<b>Reviewing</b>	<a href="#">Publons profile</a> Nature Communications (2019) Bioinformatics (2019) Nature Scientific Reports (2019) FEMS Yeast Research (2018) Nucleic Acid Research (2016)
<b>Volunteering</b>	International Student Network (Leiden) 2013-2020. Set construction and management. Dutch Red Cross (Den Haag) 2014-2015. First Aid (EHBO) at events and refugee centers.
<b>Hackathons</b>	Hackathon for Good 2019, The Hague: <a href="#">Translators Without Borders challenge</a> Hackathon for Good 2018, The Hague: <a href="#">Asser Lang-grabbing challenge</a>

## Talks

### Conference talks

2019

DUSRA 2019: Presenter  
*A combined lifestyle intervention induces a sex-specific sensitization of the blood transcriptomic response to a nutrient challenge*

LANDac 2019: Panel organizer and presenter  
*Uniting Global and Hyper-Local Data for Land: The use of global and local data for land grabbing risk prediction*

European Dialogue on Internet Governance, EuroDIG 2019: Panel organizer and presenter  
*Digital cooperation in action - A collaborative case study: Predicting Land Grabbing*

BioSB 2019: Presenter  
*Nutrient challenge exposes transcriptomic shift by lifestyle intervention in healthy participants*

2016

ECCB Student Symposium 2016: Presenter  
*Karyotype specific expression in Agaricus bisporus*

2015

BBC Student Symposium 2015: Presenter  
*Alternative Splicing in mushrooms from RNA-Seq*

2013

Pattern Recognition in Bioinformatics 2013: Presenter  
*Conditional Random Fields for protein function prediction*

### Invited talks

2014

Heriot Watt University, Computer Science Seminar Series  
*Detecting and visualizing statistically significant clusters of conserved genes of diverged genomes.*

## Conference Organization

2019

LANDac 2019: Panel organizer  
*Uniting Global and Hyper-Local Data for Land*

European Dialogue on Internet Governance, EuroDIG 2019: Panel organizer  
*Digital cooperation in action - A collaborative case study*
