D.O.B. April 8th 1989
Nationality: German

Private address:
Morskade 14
2332 GB Leiden
The Netherlands

Last updated September 17, 2019.

Personal profile

Currently, I am a Postdoc in the department of Molecular Epidemiology at the Leiden University Medical Centre, working on translational research of healthy ageing. Bioinformatics is a constantly developing field, with continuously evolving measurements that presents a splendid opportunity to develop and apply novel methods. It also requires the practitioner to develop multidisciplinary skills from the statistical, computational and biological domains. I am excited to be part of this field, where my knowledge and competences are constantly challenged, humbled and developed.

Employment

| | |
|----------------------------|--|
| Jan. 2018 - Present | Postdoc at Department of Molecular Epidemiology, Leiden University Medical Centre <i>Bioinformatician on healthy ageing, together with Max Plank Institute of Biological Ageing. Within the ERC funded "Geroprotect" project.</i> |
| Nov. 2016 - 2017 | Postdoc at KNAW/Westerdijk Institute of Fungal Biodiversity <i>Embedded bioinformatician.</i> |
| Nov. 2012 - 2016 | PhD Candidate <i>Conducted research and performed teaching. Within the STW funded "Push the white button" project.</i> |

Education

| | |
|------------------|---|
| 2012-2018 | Pattern Recognition and Bioinformatics group, TU Delft, The Netherlands <i>PhD in Bioinformatics.</i> <i>Bioinformatic Analysis of Genetic and Transcriptomic Variation in Fungi.</i> |
| 2010-2012 | Leiden University, Leiden, The Netherlands (In cooperation with TU Delft) <i>MSc Computer Science Track Bioinformatics.</i> <i>Thesis on protein function prediction using Conditional Random Fields.</i> |
| 2008-2010 | Heriot Watt University, Edinburgh, Scotland <i>BSc (Ord) Computer Science</i> <i>Graduated with distinction.</i> |
| 2007-2008 | Napier University, Edinburgh, Scotland <i>Certificate of Higher Education</i> <i>Completed year 1 of Computer Studies, then transferred to Heriot Watt University.</i> |

Skills

| | |
|-------------------------|--|
| Technical Skills | Analysis of Sanger, NGS and long-sequencing data (genomic, transcriptomic, epigenomic). Genetic/Genomic analysis (Genome assembly, Linkage analysis, *-WAS & *-QTL, Phylogenetic analysis, variant calling) Transcriptomic analysis (Differential expression, alternative splicing, variant calling, timeseries analysis). Epigenetic analysis (Methylation), and metabolomic data. Machine learning and statistics; "Data Science". Python, Scala, C/C++, Java, Shell, Matlab, R |
|-------------------------|--|

Languages

Experience with schedulers (SLURM, PDB) and version control software, (SVN, Git).
SQL, XML (and related technologies), L^AT_EX.
Vector image manipulation (Inkscape, Affinity Designer).
Pipeline development and management (Snakemake, Anaconda, Jupyter Notebook).
Experienced with Unix environments (primarily Linux).

Fluent in Norwegian, German and English.
High level Dutch. Beginners French.

Referees

Upon request

Contact Thies for referee contact details.

Teaching

MSc Courses

Functional Genomics and Systems Biology
Lecturer and teaching assistant. Fall 2014, 2015, and 2016 at TU Delft

Computational Molecular Biology
Teaching assistant. Spring 2012 at Leiden University

BSc Courses

Biomedical Informatics
Lecturer. Fall 2019 at Leiden University Medical Center.

Clinical Research in Practice
Lecturer. Fall 2019 at Leiden University Medical Center.

Clinical Biotechnology: Bioinformatics
Teaching assistant. Fall 2018, 2019 at TU Delft.

Molecular Data Science
Teaching assistant. Spring 2018 at Leiden University Medical Center

Life Science and Technology Bioinformatics
Teaching assistant. Spring 2016 at TU Delft.

Genome Scale Data Analysis
Lecturer and teaching assistant. Fall 2014 at TU Delft

External Courses

Quantitative biology summer school
Lectured on computational aspects of synten and alternative splicing in fungi.
Summer 2015 at Utrecht University.

Student Supervision

Myrthe de Haan

B.Sc student 2019-2020
Using the drug-protein interactome to predict intervention-mimicing drugs.

Jet Beekwilder

B.Sc Student 2017-2018
Comparison of DNA extraction methods from fungi for Nanopore sequencing.

André Vollerling

M.Sc Student 2014-2015
Heterosis: Finding Associated Genomic Regions. (Under embargo)

Valerie Pourquie

B.Sc Student 2015
Conservation of polarization proteins in yeast and fungi.

Dimitris Palachanis

M.Sc Student 2013-2014
Using the Multiple Instance Learning framework to address differential regulation.

Other activities/skills/information

Awards

Nature Ageing, Rejuvenation and Health Conference 2019, 'Best Poster' award.
ECCB 2016 Student Symposium, 'Best Oral Presentation' award.
Benelux Bioinformatics Conference 2015 Student Symposium, 'Best Oral

| | |
|---------------------|--|
| | presentation'. TU Delft Graduate School, 'Best poster presentation' award 2013. Scott Logic Computer Science Prize 2010. |
| Reviewing | Publons profile Nature Scientific Reports (2019) FEMS Yeast Research (2018) Nucleic Acid Research (2016) |
| Volunteering | International Student Network (Leiden) 2013-2019. Set construction and management. Dutch Red Cross (Den Haag) 2014-2015. First Aid (EHBO) at events and refugee centers. |
| Hackathons | Hackathon for Good 2019, The Hague: Translators Without Borders challenge Hackathon for Good 2018, The Hague: Asser Lang-grabbing challenge |
